

## SEVENTIETH REPORT ON BARROWS

BY C. E. BIRKETT DIXON, RECORDER

As this is the first Report to be given since the death of Mr. R. Hansford Worth, I have endeavoured to collate all the available information on the kistvaens of Dartmoor so as to present an overall picture of the location of these remains.

Having thus summarized the position up to date, I shall do my best in attempting to maintain the standard of Reports prepared by my predecessor.

Recently I have discovered two barrows not previously reported, one in the Plym and the other in the Erme valley. Both possibly contain kistvaens, and will be described in my next report, together with a plan of the kistvaen at Red Lake Foot in the Erme valley, described in the sixty-ninth Report. (*Trans. Devon. Assoc.*, vol. lxxxii, p. 45.)

### THE KISTVAENS OF DARTMOOR

This list has been compiled to present in compact form the positions at a glance of all known Dartmoor kistvaens, the maps on which they are shown, and the Barrow Report in which further information may be found.

The numbers given are a continuation of those commenced in the nineteenth Report in 1900.

Where positions differ from those given previously in Reports, or on maps, the following positions may be taken as correct.

Kistvaens not marked on the present editions of Ordnance Survey maps have the respective map numbers shown in brackets.

Whilst every care has been taken in compiling this list, and revising positions, it is requested that anyone having queries will contact me.
